Preface vii

Chapter 1. Theory of interactions in nanostructures

Few electron nanostructures: a laboratory for studying strongly interacting systems
P.A. Lee 1

Theory of quantum dot helium
D. Pfannkuche, R.R. Gerhardts, P.A. Maksym and V. Gudmundsson 6

Coulomb interaction and transport in tunnel junctions and quantum dots
T. Brandes, W. Häusler, K. Jauregui, B. Kramer and D. Weinmann 16

Coulomb blockade in resonant magnetotunneling through rectangular quantum dots
J.J. Palacios, L. Martin-Moreno and C. Tejedor 27

Interdot tunneling and Coulomb correlation
G.W. Bryant 34

Chaos and fluctuations in quantum dots
A.D. Stone and H. Bruus 43

Quantum interference, tunnel junctions and resonant tunneling interferometer
Y.V. Nazarov 57

Chapter 2. Transport experiments on quantum dots

Coulomb interactions and energy-level spectrum of a small electron gas
P.L. McEuen, N.S. Wingreen, E.B. Foxman, J. Kinaret, U. Meirav, M.A. Kastner, Y. Meir and S.J. Wind 70

Coulomb charging of a quantum dot in the presence of adiabatically transmitted edge channels
B.W. Alphenaar, A.A.M. Staring, H. van Houten, I.K. Marmorkos, C.W.J. Beenakker and C.T. Foxon 80

Coulomb blockade and off-resonance tunneling in small electronic systems
D.C. Glattli 88

Charging effects in quantum dots at high magnetic fields
N.C. van der Vaart, A.T. Johnson, L.P. Kouwenhoven, D.J. Maas, W. de Jong, M.P. de Ruyter van Steveninck, A. van der Enden, C.J.P.M. Harmans and C.T. Foxon 99

Magnetotransport investigations of a quantum dot with a small number of electrons
J. Weis, R.J. Haug, K. von Klitzing and K. Ploog 111

Single-electron capacitance spectroscopy of a few electron box
R.C. Ashoori, H.L. Stormer, J.S. Weiner, L.N. Pfeiffer, S.J. Pearton, K.W. Baldwin and K.W. West 117

Transport in sub-micron resonant tunnelling devices
P.C. Main, P.H. Beton, M.W. Dellow, L. Eaves, T.J. Foster, C.J.G.M. Langerak, M. Henini and J.W. Sakai 125

Vertical transport and tunneling through squeezable quantum dots
N. Blanc, P. Guéret, R. Germann and H. Rothuizen 135

Chapter 3. Theory of confined structures in the FQHE regime

A quantum dot in the fractional quantum Hall regime
J.M. Kinaret 142

Single-electron tunneling in the fractional quantum Hall effect regime
C.W.J. Beenakker and B. Rejaei 147

The role of accumulation layers in quantum dot arrays and quantum Hall effect devices
A. Groshev and G. Schön 157

Chapter 4. Optical properties of quantum dots

Far-infrared spectroscopy of quantum dots
U. Merkt 165

Photon echo and exchange effects in quantum-confined semiconductors
S.W. Koch, Y.Z. Hu and R. Binder 176

Chapter 5. Magnetic properties of nanostructures

Quantum tunneling and dissipation in nanometer-scale magnets
D. Loss, D.P. DiVincenzo, G. Grinstein, D.D. Awschalom and J.F. Smyth 189

Aharonov–Bohm ballistic billiards
L.P. Lévy, D.H. Reich, L. Pfeiffer and K. West 204

Chapter 6. New techniques for the study of nanoscale structures

Even–odd symmetry breaking in the NSN Coulomb blockade electrometer
T.M. Eiles, J.M. Martinis and M.H. Devoret 210

Polarization charge relaxation and the Coulomb staircase in ultrasmall double-barrier tunnel junctions
C. Schönenberger, H. van Houten and C.W.J. Beenakker 218

Conductance and supercurrent discontinuities in atomic size point contacts
C.J. Muller, J.M. van Ruitenbeek, C.W.J. Beenakker and R. de Bruyn Ouboter 225

Transport in nanoscale silicon clusters
R. Tsu 235

Chapter 7. Quantum transport in one-dimensional wires

Co-tunneling via the one-dimensional Wigner lattice
D.V. Averin and Yu.V. Nazarov 241

Transmission through barriers and resonant tunneling in a Luttinger liquid
C.L. Kane 250

Electron transport in quantum wires: effects of electromagnetic interaction
A.A. Odintsov 258

Conductance and Coulomb blockade in a multi-mode quantum wire
K.A. Matveev and L.I. Glazman 266

List of contributors 275

Subject index 277
